

2023

OUTDOOR

I AM NOMAD[®]

Since 1978 my life has taken me all over the globe. I've been to the North Pole and around the corner. Yes, around your corner too. You could say I am always on the move. And it still inspires me every day to create just the right gear for your journeys, short or long.

#IAMNOMAD

OUR JOURNEY TOWARDS SUSTAINABILITY

WHAT WE MAKE:

In our 2023 collection all the following items
are made from recycled material:

- ALL BACKPACK FABRICS
- ALL STUFFSACKS
- AN INCREASING AMOUNT
OF SLEEPING BAG MATERIALS

That means over 45,000M of polyester is saved.
That is enough fabric to go around the earth once!

We are proud to announce that as of 2022, all
of the NOMAD® sleeping bags, sleeping mats,
packs and bags are 100% PFC-free. An important
step in our journey towards full sustainability &
being more environmentally friendly.

100%

SUSTAINABILITY

Nature is our favorite playground and our greatest inspiration. As a manufacturer of outdoor gear and wear, we feel it's our utmost responsibility to treat and protect it as best we can.

We believe that creating products that last is the most powerful tool to minimize our impact.

Sustainability and social responsibility are at the top of our list.

Therefore, we aim to source and produce our products in the most ethical and sustainable way possible, with respect to humans and the environment.

WE USE RECYCLE MATERIALS

In all our collections, all raincovers, stuffsacks and bag linings are made from recycled materials (GRS, Global Recycling Standard).

This allows us to save more than 45,000 km of polyester yarn, which is enough for a trip around the world!

HOW IT'S MADE:

REPAIR SERVICES

We build our products to last, should they fail, we offer repair services in UK, Netherlands, Belgium & Germany.

BSCI

We work with BSCI compliant producers in order to insure our products are made in factories with respectful working conditions.

RESPONSIBLE DOWN STANDARD (RDS)

We only work with RDS standard down in all our products.

All the down we use is certified by the RDS. This means all the down and feathers in our products are sourced from ducks and geese that have been treated well. They have been allowed to live healthy lives, allowed to express innate behaviour and not suffer pain, distress or fear. This standard provides full traceability from farm to product so people can be confident that the feathers used really are RDS standard approved. NOMAD® is certified to the RDS through CU 84 77 15.

FLUOROCARBON-FREE WATER REPELLENT

We use PFC free treatments whenever possible on our products (sleeping bags, bags) to make them water resistant.

NIKWAX HYDROPHOBIC DOWN™

A high performance, fluorocarbon-free water resistant down fill used in our top range sleeping bags. Insures high insulation even in cold and damp conditions. Keeps you dry, warm and comfortable for sleeping in the most challenging of conditions. By keeping the down dry and microbe free, this treatment extends the lifetime of the sleeping bag.

PERTEX QUANTUM PRO®

Pertex®Quantum Pro is a fabric with an ultra thin water resistant coating to provide increased weather resistance to extreme weather conditions. We have used this technology in our top range winter sleeping bags to insure maximum transfer of body moisture vapour out through the bag lining, but protection from all damp and condensation from entering.

DAC® POLES

We choose to work with DAC poles because they are top quality renowned for their strength and durability. All the poles used for our tents are Green Anodized- a manufacturing process that minimises water use, as well as air and water pollution.
